## LINEA PER PANIFICAZIONE e PASTICCERIA

**La ferma-lievitazione è un processo automatico programmato per la lievitazione degli impasti di pane e pasticceria nel tempo desiderato.**

I nostri quadri di comando MICRO C10 1.5 o PRO-10 TS touch screen assicurano la gestione del processo di lievitazione con il completo controllo dei tempi, della temperatura e dell'umidità nelle varie fasi di lavoro.

### VANTAGGI

- Permette di migliorare l'organizzazione produttiva, fino a eliminare il lavoro notturno e festivo.
- Perfeziona la qualità, l'uniformità, il sapore e l'aroma del prodotto, conservando tutti i valori nutrizionali.
- Riduce i tempi e i costi di produzione, rinnovando la metodologia del lavoro, con grande flessibilità.
- Rende più leggero e più proficuo il lavoro professionale del panettiere e del pasticcere.

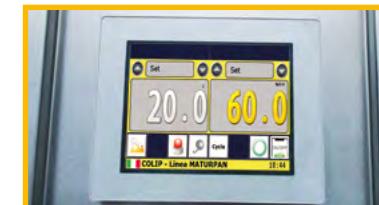

## LINE FOR BAKERY and PASTRY

The 'retarded-proving' is a programmed automatic process for the fermentation of bread and pastry doughs in the desired time.

Both our MICRO C10 1.5 and PRO-10 TS touch screen control panel assure the proofing (also called proving) process management with the complete control of times, temperature and humidity during the different working stages.

### BENEFITS

- It allows to improve production organization, up to eliminate night and holiday work.
- It brings to perfection the product in quality, uniformity, flavor and aroma, by conserving all nutritional properties.
- It reduces the times and costs of production, renewing working methods, with great flexibility.
- It makes far lighter and more profitable the job both for the baker and the pastry chef.

## LÍNEA PARA PANADERÍA y PASTELERÍA

La fermentación controlada es un proceso automático programado para la fermentación de las masas de pan y pastelería en el tiempo deseado.

Nuestros cuadros de mando MICRO C10 1.5 o PRO-10 TS con pantalla táctil aseguran la gestión del proceso de fermentación con el control completo de los tiempos, temperatura y humedad en las distintas fases de trabajo.

### VENTAJAS

- Permite de mejorar la organización productiva, hasta eliminar el trabajo nocturno y festivo.
- Perfecciona la calidad, la uniformidad, el sabor y el aroma del producto, conservando todos los valores nutricionales.
- Reduce los tiempos y los costes de producción, renovando la metodología del trabajo, con gran flexibilidad.
- Hace mucho más ligera y más rentable la labor profesional del panadero y del pastelero.
